#### Special Note:

Your grade is not a negotiation. It is not a measure of how well I like you or dislike you. It is not a measure of whether or not you spent numerous hours in my office getting special help. It is not determined based upon whether or not you are expected to graduate next month. It is not determined based upon whether or not this is the second or fourth time you have taken this course. Each student will get the grade that they earn.

Your grade is a mathematical calculation of the components listed in the course grading section of this syllabus. All student will be graded equally and fairly.

Let's have a great semester!
